Superfund hazardous waste site listed under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended in 1986

PASCO SANITARY LANDFILL  
Pasco, Washington

Conditions at listing (June 1988): Pasco Sanitary Landfill covers 250 acres .15 miles northeast of Pasco, Franklin County, Washington, in an area dominated by irrigated agricultural fields and range land. The landfill is privately owned and operated and was converted from a burning dump to a sanitary landfill in 1971. Since 1982, it has had a conditional use permit from the Washington Department of Ecology (WDOE) to accept municipal wastes.

In 1972, Resource Recovery Corp. leased a portion of the landfill and operated a regional hazardous waste disposal site under a WDOE permit until December 1974, when the lease terminated.

According to WDOE files, over 47,000 drums of hazardous substances including paint wastes, pesticides, organic solvents, cadmium, and mercury, were deposited in the leased portion of the landfill. In 1974, the area was covered by 3 feet of soil.

In 1985, EPA detected tetrachloroethylene and trichloroethylene in on-site ground water. A well on-site supplies drinking water to two nearby residences. Ground water within 3 miles of the site is used by over 1,000 people for drinking and is also used to irrigate almost 10,000 acres of land.

In October 1986, WDOE issued an Administrative Order requiring Resource Recovery Corp. to monitor on-site wells on a quarterly basis. The company is currently complying with the order.

Status (December 1989): Resource Recovery Corp. has completed a hydrogeological evaluation of the site and continues to monitor on-site wells on a quarterly basis.

Facility name: Pasco Sanitary Landfill

Location: Pasco, Washington

EPA Region: 10

Person(s) in charge of the facility: Larry Dietrich

Name of Reviewer: Lynn Guilford Date: 5/27/87

General description of the facility:  
 (For example: landfill, surface impoundment, pile, container; types of hazardous substances; location of the facility; contamination route of major concern; types of information needed for rating; agency action, etc.)

Resource Recovery Corporation operated a portion of Pasco Sanitary Landfill as a hazardous waste disposal site from 1972 to 1974. Currently the disposal areas are all covered with three feet of soil. This cover gives both the surface water and direct contact routes scores of 0. The ground water route has an observed release and a large ground water population giving the site an overall score of 44.46

Scores:  $S_M = 44.46$  ( $S_{gw} = 76.92$   $S_{sw} = 0$   $S_a = 0$ )  
 $S_{FE} = 0$   
 $S_{DC} = 0$

## DOCUMENTATION RECORDS

FOR

## HAZARD RANKING SYSTEM

Instructions: The purpose of these records is to provide a convenient way to prepare an auditable record of the data and documentation used to apply the Hazard Ranking System to a given facility/site. As briefly as possible summarize the information you used to assign the score for each factor (e.g., "Waste Quantity = 4320 drums plus 800 cubic yards of sludges"). The source of the information should be provided for each entry and should be a biographical-type reference that will make the source used for the data point easier to find. Include the location of the source and consider appending a copy of the relevant page(s) for ease in review.

## GROUND WATER ROUTE

### 1. OBSERVED RELEASE

#### 1a. Contaminants Detected (5 maximum) in Ground Water

Tetrachloroethylene was found in monitoring well EE2.  
Trichloroethylene was found in monitoring wells EE2, EE3, and JUB 2.  
The levels found were significantly over background (JUB-CATR)

#### - Rationale for attributing the contaminants to the facility:

These compounds, tetrachloroethylene and trichloroethylene, were not found in background wells, but were only found in wells downgradient and adjacent to zone A and the old landfill burn and demolition disposal area. Paint wastes were disposed in Zone A.

HRS Section Score: 45 (Ref. 1 p50)

\* \* \* \* \*

### 2. ROUTE CHARACTERISTICS

#### 2a. Depth to Aquifer of Concern

#### - Name and description of aquifer(s) of concern:

Water table aquifer, unconfined, which overlies Yakima Basalts. Groundwater occurs 38.5 to 68.7 feet below ground surface at site. See table 4.1 and figures 4.2 and 4.3 of Reference 1 for description of geologic units and cross-sections.

HRS Section Score: (Ref. )

#### 2b. Net Precipitation

- Mean annual or seasonal precipitation (list months for seasonal):
- Mean annual lake evaporation rate (list months for seasonal):
- Net precipitation (subtract above figures):

HRS Section Score: (Ref. )

*[Handwritten signature]*  
7-17-85

2c. Permeability of Unsaturated Zone

- Soil type in unsaturated zone:
- Permeability associated with soil type:

HRS Section Score: (Ref. )

2d. Physical State

- Physical state of substance at time of disposal (or at present time for generated gases):

HRS Section Score: (Ref. )

\* \* \* \* \*

3. CONTAINMENT

3a. Containment

- Method(s) of waste or leachate containment evaluated:
- Method with highest score:

HRS Section Score: (Ref. )

\* \* \* \* \*

4. WASTE CHARACTERISTICS

4.a Toxicity and Persistence

- Compound(s) evaluated:

Compound	Toxicity	Persistence	Total
Trichloroethylene	2	2	12
Tetrachloroethylene	2	2	12

- Compound(s) with highest score:

Tetrachloroethylene and Trichloroethylene

HRS Section Score: 12 (Ref. 2)

*Handwritten signature*  
7-17-8-

#### 4b. Hazardous Waste Quantity

- Total amount of hazardous substance at the facility, excluding those with a containment score of zero. (Give a reasonable estimate, even if the quantity is above maximum.):

The total waste quantity is estimated to be approximately 47,000 drums.

- Basis of estimating and/or computing waste quantity (must be documented quantity and not assumed):

Paint Wastes - 26,426 drums  
2,4-D Mfg. wastes - 5,080 drums  
Carcinogenics - 9 drums  
Aromatic Tar - 1,159 drums  
Cadmium Waste - 11 drums

Pesticides - 425 drums  
Metal Finishing/Cleaning  
- 10,947 drums  
Solvents - 253 drums  
Barium with Mercury  
- 2,896 drums

HRS Section Score: 8 (Ref. 1,3,4,5)

\* \* \* \* \*

#### 5. TARGETS

##### 5a. Ground Water Use

- Use(s) of aquifer(s) of concern within a 3-mile radius of the facility:

Ground water is used for drinking water and irrigation within three miles of the site. Some of the wells used for drinking water are beyond the perimeter of the public water supply system.

HRS Section Score: 3 (Ref. 6,7,8,  
9,10,11,12,13)

##### 5b. Distance to Nearest Well

- Location of nearest well drawing from the "aquifer of concern" or occupied building not served by a public water supply:

SW 1/4, NW 1/4, Section 22, Township 9N, Range 30E.

- Distance from site to above well or building:

The well is on site, approximately 800 feet north of monitoring wells EE2, EE3, and JUB 2, which are contaminated.

HRS Section Score: 4 (Ref. 11,13 )

*Handwritten signature and date:*  
7-17-87

5c. Population Served by Ground Water within a 3-Mile Radius

- Identify water supply well(s) drawing from the "aquifer of concern" within a 3-mile radius and populations served by each:

See sheet 4A

Total 260

- Compute land area irrigated by supply well(s) drawing from the "aquifer of concern" and convert to population (1.5 people per acre):

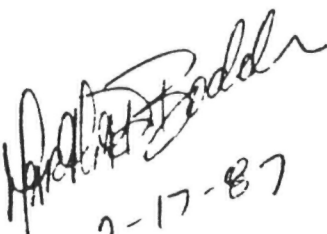

See Sheets 4B,C,D Total 14,820 people

- Total population served by ground water:

$$260 + 14820 = 15080$$

HRS Section Score: 40 (Ref. 7,8,9,  
10,11,12,13,14)

SURFACE WATER ROUTE

1. OBSERVED RELEASE

1a. Contaminants Detected in the Surface Water at the Facility or Down Gradient from It (5 maximum)

No observed release.

- Rationale for attributing contaminants to the facility:

HRS Section Score: (Ref. )

\* \* \* \* \*

2. ROUTE CHARACTERISTICS

2a. Facility Slope and Intervening Terrain

- Average slope of facility/s in percent:

The site is relatively flat (less than 1%).

- Name description of nearest down-slope surface water:

The only down slope water within two miles is a man-made dairy pond.

- Average slope of terrain between facility and above-cited surface water body in percent:

The average slope is less than 1%.

- Is the facility located either totally or partially in surface water?  
Yes / No (circle one)

- Is the facility completely surrounded by areas of higher elevation?  
Yes / No (circle one)

HRS Section Score: 0 (Ref. 1,12,13)

2b. 1-Year 24-Hour Rainfall in Inches

Less than 0.75

HRS Section Score: 0 (Ref. 2 )

*[Handwritten signature]*  
7-17-8

2c. Distance to Nearest Down-slope Surface Water

The man-made dairy pond is approximately 1,500 feet southwest of the site. No natural water is located within two miles of the site.

HRS Section Score: 0 (Ref. 1,12,13,  
15,16)

2d. Physical State of Substance at Time of Disposal

No known waste is available to surface water migration.

HRS Section Score: 0 (Ref. 1 )

\* \* \* \* \*

3. CONTAINMENT

3a. Containment

- Method(s) of waste or leachate containment:

All known hazardous wastes have been covered.

- Method with highest score:

All known hazardous wastes are covered with three feet of soil, four mil polyethylene sheeting, and capped with an additional two feet of soil.

HRS Section Score: 0 (Ref. 1 )

\* \* \* \* \*

4. WASTE CHARACTERISTICS

4a. Toxicity and Persistence

- Compound(s) evaluated:

Compound	Toxicity	Persistence	Total

*Handwritten signature*  
2-17-87

- Compound(s) with highest score:

No known compounds are available to migration.

HRS Section Score: 0 (Ref. 1 )

#### 4b. Hazardous Waste Quantity

- Total amount of hazardous substance at the facility/site, excluding those with a containment score of zero. (Give a reasonable estimate, even if the quantity is above maximum.):

No known waste is available to surface water migration.

- Basis of estimating and/or computing waste quantity (must be documented and not assumed):

HRS Section Score: 0 (Ref. 1 )

\* \* \* \* \*

### 5. TARGETS

#### 5a. Surface Water Uses

- Use(s) of surface water within 3-miles downstream of the hazardous substance:

No natural surface water is used within two miles of the site and no known hazardous wastes are available to migration.

- Is there tidal influence? Yes / No (circle one)

HRS Section Score: (Ref. 1 )

#### 5b. Distance to Sensitive Environment

- Distance to 5-acre (minimum) coastal wetland, if 2 miles or less:
- Distance to 5-acre (minimum) fresh-water wetland, if 1 mile or less:
- Distance to critical habitat of federal endangered species or national wildlife refuge, if 1 mile or less:

HRS Section Score: 0 (Ref. 1 )

*[Handwritten signature]*  
2-17-87

5c. Population Served by Surface Water

- Location(s) of water-supply intake(s) within 3 miles (free-flowing bodies) or 1 mile (static bodies) downstream of the hazardous substance and population served by each intake:

No known wastes are available to surface water. No natural surface water is located within two miles of the site.

- Compute land area irrigated by above-cited intake(s) and convert to population (1.5 people per acre):
- Total population served: 0
- Name and description of nearest above-cited water bodies:
- Distance from probable point of entry to above-cited intakes (stream miles):

HRS Section Score: 0 (Ref. 1,12,13,  
15,16)

\* \* \* \* \*

*Handwritten signature*  
7-17-87

AIR ROUTE

1. OBSERVED RELEASE

1a. Contaminants Detected in Ambient Air

None observed.

- Date and location of detection of contaminants:
- Method used to detect contaminants:
- Rationale for attributing contaminants to the site:

HRS Section Score: 0 (Ref. 1,15 )

\* \* \* \* \*

2. WASTE CHARACTERISTICS

2a. Reactivity and Incompatibility

- Most reactive compound:
- Most incompatible pair of compounds:

HRS Section Score: (Ref. )

2b. Toxicity

- Most toxic compound:

<u>Compound</u>	<u>Toxicity</u>

HRS Section Score: (Ref. )

2c. Hazardous Waste Quantity

- Total quantity of hazardous waste at the facility/site:

*Handwritten signature*  
7-17 B

- Basis of estimating and/or computing waste quantity:

HRS Section Score: (Ref. )

\* \* \* \* \*

### 3. TARGETS

#### 3a. Population Within 4-mile Radius

- Enter data under respective radius and indicate how determined:

0 to 4 miles	0 to 1 mile	0 to 1/2 mile	0 to 1/4 mile

HRS Section Score: (Ref. )

#### 3b. Distance to Sensitive Environment

- Distance to 5-acre (minimum) coastal wetlands, if 2 miles or less:
- Distance to 5-acre (minimum) fresh-water wetland, if 1 mile or less:
- Distance to critical habitat of an endangered species, if 1 mile or less:

HRS Section Score: (Ref. )

#### 3c. Land Use

- Distance to commercial/industrial area, if 1 mile or less:
- Distance to national or state park, forest, or wildlife reserve, if 2 miles or less:
- Distance to residential area, if 2 miles or less:
- Distance to agricultural land in production within past 5 years, if 1 mile or less:

*Handwritten signature*  
7-17-87

- Distance to prime agricultural land in production within past 5 years,  
if 2 miles or less:

- Is a historic or landmark site (National Register of Historic Places  
and National Natural Landmarks) within the view of the site:

HRS Section Score: (Ref. )

*Handwritten signature*  
7-17-87

## FIRE AND EXPLOSION

### FIRE MARSHAL'S STATEMENT:

This site poses no fire/explosive potential (Ref. 16).

#### 1. CONTAINMENT

- Hazardous substance present:
- Type of containment, if applicable:

HRS Section Score: (Ref. )

\* \* \* \* \*

#### 2. WASTE CHARACTERISTICS

##### 2a. Direct Evidence

- Type of Instrument and Measurement:

HRS Section Score: (Ref. )

##### 2b. Ignitability

- Compound considered:

HRS Section Score: (Ref. )

##### 2c. Reactivity

- Most reactive compound:

HRS Section Score: (Ref. )

##### 2d. Incompatibility

- Most incompatible pair of compounds:

HRS Section Score: (Ref. )

*Handwritten signature*  
7-17-87

2e. Hazardous Waste Quantity

- Total quantity of hazardous substance(s) at the facility/site:
- Basis for estimating and/or computing waste quantity:

HRS Section Score: (Ref. )

\* \* \* \* \*

3. TARGETS

3a. Distance to Nearest Population

HRS Section Score: (Ref. )

3b. Distance to Nearest Building

HRS Section Score: (Ref. )

3c. Distance to Nearest Sensitive Environment

- Distance to wetlands:
- Distance to critical habitat:

HRS Section Score: (Ref. )

3d. Land Use

- Distance to commercial/industrial area, if 1 mile or less:
- Distance to national or state park, forest, or wildlife refuge, if 2 miles or less:
- Distance to residential area, if 2 miles or less:
- Distance to agricultural land in production within past 5 years, if 1 mile or less:

*[Handwritten signature]*  
7-17-8-

- Distance to prime agricultural land in production within past 5 years,  
if 2 miles or less:

- Is a historic or landmark site within view of the site?  
Yes / No (circle one)

HRS Section Score: (Ref. )

3e. Population Within 2-Mile Radius

HRS Section Score: (Ref. )

3f. Buildings Within 2-Mile Radius

HRS Section Score: (Ref. )

7-17-67

DIRECT CONTACT

1. OBSERVED INCIDENT

1a. Date, Location, and Pertinent Details of Incident

No observed incident reported.

HRS Section Score: 0 (Ref. 1,15 )

\* \* \* \* \*

2. ACCESSIBILITY

2a. Describe Type of Barrier(s)

Site is not fenced. However, the operator's residence is on site.

HRS Section Score: 1 (Ref. 17 )

\* \* \* \* \*

3. CONTAINMENT

3a. Type of Containment, if Applicable

The known hazardous waste is covered with three feet of soil, four mil polyethylene sheeting, and capped with an additional two feet of soil.

HRS Section Score: 0 (Ref. 1 )

\* \* \* \* \*

4. WASTE CHARACTERISTICS

4a. Toxicity

- Compounds evaluated:

<u>Compound</u>	<u>Toxicity</u>
No compounds available for contact.	

- Compound with highest score:

HRS Section Score: 0 (Ref. 1 )

*[Handwritten signature]*  
7.17.87

\*\*\*\*\*

5. TARGETS

5a. Population Within 1-mile Radius of Site

No compounds available for contact.

HRS Section Score: (Ref. 1 )

5b. Distance to Critical Habitat (of Endangered Species)

HRS Section Score: (Ref. )

\*\*\*\*\*
